

#### Program 1:

color(var0, gray)
/\ front(var0, var1)
/\ color(var1, brown)

### **Output:**

{ var0 = **G**, var1 = **F** }

## Program 2:

color(var0, gray)
/\ front(var0, var1)
/\ shape(var1, cube)

## **Output:**

{ var0 = G, var1 = C } { var0 = G, var1 = B }

### **Program:**

color(var0, blue) /\ shape(var0, cube) /\ size(var0, large)
/\ left(var0, var1) /\ left(var1, var2)
/\ left(var0, var2) /\ color(var2, blue) /\ shape(var2, cube)
/\ size(var2, large) /\ material(var2, rubber)

# **Output:**

 $\{ var0 = A, var1 = B, var2 = C \}$
